

OTULAJA FAVOUR

Job intention: Frontend , Backend, Full stack dev

About Me

I am a full stack developer with a passion for crafting fast, reliable, and user-centric web applications. Proficient in both backend and frontend technologies, I utilize Laravel, PHP, Node.js/Express, React, Next.js, Nuxt, Reactnative and Vue.js. I possess a strong aptitude for creating APIs, integrating authentication mechanisms, and managing databases such as MySQL, MongoDB, and SQLite. My commitment to writing clean, comprehensible code allows me to efficiently oversee projects from inception to completion—encompassing everything from database architecture to interface design. I am fervently

Skilled

Web development

Design Thinking

Responsive Design

Testing and debugging

Computer literacy

Education

Renewable Energy

Gateway ICT Polytechnic, Saapade (2022 – 2024)

Computer science

Tai Solarin University of Education (2025 – Present)

Work

Full Stack Developer — Nebula (2025)

- Built modern, responsive web applications using Laravel, Node.js/Express, PHP, and JavaScript frameworks like React, Next.js, Nuxt, and Vue.js.
- Handled the full development stack: database architecture, backend development, and frontend UI/UX implementation.
- Served as CTO for two startups, leading development and deployment of live platforms: tdi.ng and techieonplatform.ng.
